ACADEMIC IT SOLUTIONS

We offer staff with specific Academic IT expertise, who bring insight and best practices to help schools build & deliver exceptional IT services for instructional and administration needs.

APPLICATION DEVELOPMENT

We develop custom software solutions, integrate and web enable existing data, and have particular expertise in applications for messaging, collaboration and workflow.

BUSINESS CONTINUITY/DISASTER RECOVERY

Being prepared is the best strategy for accommodating the unexpected. We can help you build a sustainable disaster recovery plan or a business continuity plan and support that initiative with our fully redundant Brush Mountain Data Center.

COLLABORATION & MESSAGING

Our portfolio of collaboration solutions deliver strategic agility, connecting your staff to collaboration & be positioned to capitalize on opportunity.

DATACENTER COLOCATION & PRIVATE CLOUD

Our Brush Mountain Data Center offers cost effective co-location for your existing equipment in an environment that is optimized, redundant & provides a range of scalable support services.

For those looking to eliminate hardware investment and secure IT resources as needed, our FLxCloud offers the best of several worlds: the ability to take hosted computing power and allocate it as needed. FLxCloud can then seamlessly and securely connect to your on-premise IT systems to provide a unique blend of IT flexibility and scalability. All at a predictable cost.

FRACTIONAL CIO SERVICES

Gain the benefit of our senior staff's experience, insights and IT best practices with "on demand" CIO services. Available for a single issue, or ongoing strategy, we provide the advice and expertise to make your plans successful.

MANAGED IT SERVICE & SUPPORT

ALI's managed services offer a tailored range of support options: from complete outsourcing to threshold monitoring & routine patching & updates.

MOBILITY & WIRELESS NETWORKS

ALI's mobility and wireless solutions support increasingly mobile, collaborative, and virtual work environments. By creating a consistent, secure experience across wired and wireless networks, we help organizations reach new levels of productivity and responsiveness.

NETWORK INFRASTRUCTURE

The design, integration and support of a network infrastructure is at the heart of ALI's expertise. We integrate operating systems, network infrastructure and applications, so organizations stay focused on their operations.

NETWORK SECURITY

Information security was once a technology issue, today it is a business issue—representing significant risk and operational challenges. ALI delivers assessment & security solutions to reduce risk of intrusion, inappropriate access and data loss, while providing responsive access for those with appropriate credentials.

STORAGE & ARCHIVING

For most organizations, managing data is a major challenge. An ALI optimized data storage solution can reduce operating costs by simplifying management and improving capacity utilization.

VIRTUALIZATION

ALI's virtualization solutions help organizations lower their IT costs, improve business continuity and streamline operations.
