

FlxStore

Managed Data Backup Services

Enjoy peace of mind with secure data back up with rapid recovery and local access.

The statistics are staggering. For organizations who experience a significant outage or data loss, 90% will fail within 2 years. 43% will never reopen for business. Is your organization prepared to survive?

Your data is a critical asset. Proactively protecting that asset is vital.

FlxStore Data Protection Services offers a range of options to ensure the integrity and availability of your organization's data. FlxStore can augment your existing data protection with the benefits of cloud and geo-diversity; or we can provide end to end data protection with on site appliance and industry-leading Veeam software and local support.

Decrease Cost & Complexity

- No capital expense.
- Predictable monthly fee.
- Scalable offering—buy what you need.
- No more tape rotations.

Reduce Risk

- Offsite backups to our secure Data Center.
- Easy access to data—speeds up restoration.

Enjoy Local Support

- Industry-leading software backed by local support.
- We warranty the appliance hardware ourselves, with local support to you.
