

A BETTER BACKUP FOR BUSINESS CONTINUITY, DISASTER READINESS & PEACE OF MIND

The statistics are staggering. Organizations that experience a significant data loss, almost half will fail immediately. 90% will fail within 2 years.

That's how critical it is to have proper data protection and data-loss readiness. Relying on outdated backup solutions can be terminal to your organization in the face of today's sophisticated threats. You need a solution that will ensure if you are hit with Ransomware, disaster or some other data loss you'll be back in business in as soon as 15 minutes.

FlxStore™ Data Protection Services securely protects your data in multiple locations with the fastest Return to Operation statistics in the industry. You get complete protection at a price point to protect both servers *and* user devices. (After all, that's where more than 50% of your data really lives.)

FLxStore also integrates with existing enterprise data protection systems to deliver Veeam's powerful features, cloud backup, geo-diversity and complete control.

With FLxStore, you get more than a backup, you get real business continuity.

Ransomware Ready

No need to pay costly ransoms to recover your valuable data. You have fast access to restore and keep your operations moving.

Fastest Recovery

Quickly recover all or just parts of your backup quickly for a high RPO/RTO. Instant VM Recovery can restore your data in as fast as 15 mins.

Data Replication Included

Efficient image-based VM replication for a stronger business continuity strategy with hybrid cloud-based disaster recovery.

On-site + Offsite Backups

Retains a copy onsite while replicating a copy securely off site to our Brush Mountain Data Centers. You get speed, convenience and peace of mind.

Total Visibility & Control

We let you have control over your data. (Or we'll manage it for you.) Access and recover data in hosted backup repositories directly from the backup console, update your settings anytime.

End to End Encryption

Rest easy. All data is encrypted before it leaves your network perimeter, in flight and at rest, without negatively impacting the data reduction ratios of built-in compression and WAN Acceleration.

Know Where Your Data Is

Our Brush Mountain Data Centers are US-based with no replication outside the United States. Perfect for ITAR and other requirements for 100% on-shore data storage.

Granular Data Restoration

Restore an entire data-set, or just a few files for one user. It's easy and fast with FLxStore.

More for Your Money

Eliminates CAPEX, management and delivers industry-leading features. Get 3x more storage, 75% more speed and peace of mind. Reduces costs today, DR readiness saves you tomorrow.
